

The DAILY SENTINEL is sent by the carrier every morning except on Sunday, and is delivered to subscribers in advance of the same time as it is distributed in the city. It is sent to subscribers from the Capital of Indiana, to get the news of the day from six to twelve hours before they receive it. It is published every day except on Sunday and on the days of the town on railroad centers in Indiana, and is supplied with the SENTINEL on as good terms as any other paper. Clubs for the Daily will be supplied at Agents' rates. Orders are solicited.

A Mistake.

The impression appears to prevail among many Democrats that we have no job office connected with the SENTINEL. This is a mistake. There is no office in the city that is so well prepared to do all kinds of BOOK AND JOB PRINTING as we are (except large bill posters), and we are not under obligations to all Democrats, but only in the city, but in the State, for any work they can send to our office. We have no public printer to depend on to do the paper—we can get the party to do it with their work, as far as they can. We can do as good work, and on as good terms, as any other office.

Valuable Documents.

We have for sale the following valuable documents, and ask Democrats to send for them, for distribution to the people.

Speeches of Hon. D. W. Voorhees upon the financial policy and of the Administration party, and his vindication of his statements in that respect in reply to the comments of Mr. Devere, of Massachusetts. These speeches show, from Republican records, the expenditure of the Administration; the amount of the public indebtedness, and the gross frauds by which that debt has been increased. Published in one pamphlet of sixteen pages, and will be furnished at \$1 per hundred, and \$10 per thousand.

Circulate the Documents.

These documents should be in the hands of every citizen in Indiana, as they discuss in a masterly manner subjects which have a deep interest for every citizen who desires to preserve constitutional liberty and to perpetuate the Union as framed by the Fathers of the Republic. Speeches should be ordered by Express, if possible, as the postage is a cent a copy, and as this must be prepaid, it is taken out of the money sent. All orders accompanied with the cash, will be promptly attended to.

The Dr. is ready to resume his practice in this city.

METROPOLITAN HALL.—Miss Kate Fisher is improving nightly in the good graces of the audience. Last night she displayed great versatility in the Young Actress, her Irish, Scotch, French, and German, all placed to her credit. To-night she will personate six characters in the drama of "Satanstoe"; also appearing in the after piece of Nature and Philosophy as Colin. A good bill and one that should fill the house are promised and an additional attraction. We shall look for it.

We were glad to see Major Fryberger, of the artillery, in the city yesterday, but sorry to learn that his health had suffered somewhat during his recent service in the armies of the Union. STATUTES OF INDIANA.

GAVIN & HORN'S REVISION.

The second volume of Messrs. Gavin & Horn's compilation of Indiana Statutes has just appeared. This volume completes their work. Its mechanical execution is very creditable, and the skill, learning, and labor which the editors have bestowed on it, merit the highest praise. None but learned, diligent lawyers could have produced such a work.

The second volume embraces all the public statutes of Indiana now in force upon the subjects to which it relates, and the first all excepting the acts of the regular and extra sessions of the Legislature. It is of a great excellence of the compilation that all existing statutes on each subject are collected together in the same place in these volumes, so that a reader can see at a glance all the legislation in force on any given subject. Take, for example, the act of 1852, organizing Courts of Common Pleas—the editors publish the act at large, and they also print, in the form of notes on the same page, containing this statute, all the acts amendatory to it which have been passed up to this time, and so they have done of all the other acts contained in the volume of 1852.

The editors have avoided much of the value of these volumes—especially the last—by the omission and retention of notes with which the volumes abound. These notes indicate much labor and legal acumen. They furnish us, in a concise and accurate form, with the history of our Supreme Court on these statutes. These adjudications being now very numerous, the references to them in the volumes under consideration, will be of great value to the lawyer, and indeed to all persons concerned in the administration of justice. The editors have also referred, in their notes, to numerous decisions in other States, made on statutes similar to ours.

An excellence of these volumes, not to be overlooked, is the full and accurate index appended to each. In Indiana, there never has been a good index to any volumes of statutes published by authority. This providing defect has been completely remedied in the volumes under review, and these indices will greatly lighten the labor of all who have occasion to look into our statutes.

This is the first time that private enterprise has attempted the publication of Indiana statutes. The attempt, I do not doubt, will be successful, and will greatly assist in the completion of the volume under review. Every lawyer, of course, purchases these volumes; and every clerk, sheriff, and justice of the peace of the State, will find it to his advantage to own them.

Indians, June 5, 1892.

The foregoing notice by Judge McDonald, of Gavin & Horn's Compilation of the Statutes of Indiana, is not designed as a puff of the work, but is an unqualified commendation of the ability, accuracy, and completeness with which these volumes have been prepared.

The second volume, which has just been issued from the press, is being delivered to subscribers as rapidly as possible. This edition of the statutes will be found a necessity to every lawyer, justice of the peace, and county officers in the State. The publication of the work is a private enterprise, and the publishers' only hope for remuneration is in this sale to those for whose convenience it was prepared. The two volumes contain about 1600 pages of matter, nearly double the quantity embraced in the edition of 1852.

The price of the set is \$4.50 per volume, or \$9.00 for the two volumes. Orders addressed to the subscriber will receive prompt attention.
